Honorable Jaime Herrera Beutler
U.S. House of Representatives
2352 Rayburn House Office Building
Washington, D.C. 20515

Dear Representatives Moore, Cole and Herrera Beutler:

We join together as 78 Safe Kids Worldwide coalitions in 33 states around the nation in strong support of your proposed bipartisan legislation, Scarlett's Sunshine Act, that provides the opportunity to significantly reduce the incidence of Sudden Unexpected Infant Death (SUID) and Sudden Unexplained Death in Childhood (SUDC). There are few things more tragic than a parent needing to arrange the funeral of their infant.

The CDC reports that an average of 3,600 infants die suddenly and unexpectedly each year. In public health, evidence is the foundation for viable solutions and prevention efforts. We need to take the "unexpected" and "unexplained" out of infant sleep death. But the present state of SUIDs research is progressing slowly at best, largely because death reporting is inconsistent. This lack of precise data is hindering progress.

Dr. Sam Hanke and his wife Maura know this tragedy. He is a pediatric cardiologist at Cincinnati Children's Hospital and on the evening of April 27 in 2010 he was sleep-deprived from his demanding work. He laid on the couch and fell asleep with his 3-week-old son, Charlie, on his chest. Early the next morning when Dr. Hanke woke up, Charlie didn't. Today, Sam and Maura strive to spread awareness of safe sleep techniques to other families through Charlie's Kids Foundation, a safety organization they founded. There are many foundations organized around the loss of infants and toddlers from SUIDS.

Provisions in Scarlett's Sunshine Act would help safe sleep advocates, public health officials and medical practitioners prevent SUIDs deaths by standardizing data collection and death reviews. It would include new grants that would enable 100 percent review of all infant deaths as well as provide training and materials for the death scene investigators. Better data would serve as a crucial springboard to developing smart solutions and spreading awareness of best practices.

An evidence-based organization, Safe Kids Worldwide is a dedicated network of more than 420 coalitions working to prevent unintentional injury, including SUIDs.

We thank you for your unwavering leadership in keeping our children safe. We look forward to working with you to pass Scarlett's Sunshine Act.

Sincerely,
